

TSURUMI PUMP

KTZE 3-phase
50Hz

Heavy duty dewatering pump - equipped with
electrode auto control system
- for professional use

Generally applicable high grade pump that can be used efficiently in draining in civil engineering. Maximum water depth 25m. Incorporating on the job requirements in the initial product design, Tsurumi has built a powerful new series of pumps to match the demands of tough drainage jobs.

Top Discharge

Pumped water cools the motor and discharges as illustrated. The motor can be cooled even when pumping a small amount of water. The top discharge arrangement allows access into areas with space limitations.

Rugged

By offering a cast iron pump body, our durability is increased over standard aluminium body pumps. With each motor size there is a choice between high head and high volume performance ranges.

Electrode auto control system

The KTZE-type is equipped with a new electrode type control system. This prevents unnecessary dry operation, which makes it ideal for work environments where noise must be prevented, for example, in night operation in residential areas. Pump operating is started when the water level rises and contacts the electrode. When the water-electrode contact is lost the timer starts operating and after one minute pump operation is stopped

Components:

001 Cable	051 Head cover
006 Cable entrance	052A Upper bearing
020 Pump casing	052B Lower bearing
021 Impeller	053 Motor protector
022 Suction plate	054 Shaft
023 Strainer	055 Rotor
025 Mechanical seal	056 Stator
026 Oil sealing	060 Bearing housing
030 Oil lifter	064 Motor casing
032. Outlet	068 Handle
035 Oil plug	090. Electrode
036 Lubricant	114 Relay
050 Motor cover
